Election of Species

A) This application contains claims directed to the following patentably distinct species:

- a) covalent binding;
- b) ligand-ligand interaction;
- c) complexing;
- d) ligation; and
- e) expression of a fusion protein comprising said antigen and said compound.

Species a-e are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the specification does not disclose a combined use of antigens containing species a-e. Additionally, the species have different designs in that each represent their unique chemical characteristics and structure. Thus, species a-e are unrelated.

B) This application contains claims directed to the following patentably distinct species:

- f) mannose carbohydrate;
- g) fucose carbohydrate;
- h) plant lectin;

- i) antibiotic;
- j) sugar;
- k) protein; and
- l) antibody.

Species f-g are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the specification does not disclose a combined use of compounds containing species f-g. Additionally, the species have different designs in that each represent their unique chemical structure and function. Thus, species a-e are unrelated.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of groups a-e and f-e for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, all claims are generic because no claim is limited to an antigen or compound used in the method of increase an immune response.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Art Unit: 1648

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
